GRAIN

JUNE, 1946

Appointments by the chair of committees at the Cedar Rapids SOGES convention included the following:

Dust Explosions Hazards

Lloyd G. Howe, North American Companies, Toronto; Percy C. Poulton, N. M. Paterson & Co., Ltd., Fort William; Frank E. Carlson, Underwriters Grain Ass'n, Chicago; Herbert L. Wilkins, Archer-Daniels-Midland Co., Minneapolis; O. A. Halberg, Pillsbury Mills, Inc., Springfield, Ill., plus chapter and district appointees.

Safety Committee

Oscar W. Olsen, F. H. Peavey & Co., Duluth; Steve Halac, The Glidden Co., Chicago; Frank E. Carlson, Underwriters Grain Ass'n, Chicago; Clyde W. Clark, Anheuser-Busch, Inc., Springfield, Mo., plus chapter and district appointees.

1947 Convention Program

Clifford A. MacIver, Archer-Daniels-Midland Co., Minneapolis; Harold C. Wilber, A. E. Staley Mfg. Co., Decatur, Ill.; Paul Christensen, Van Dusen-Harrington Co., Minneapolis; W. J. Hooper, Farmers Grain Co-operative, Ogden, Utah; Jess Pugh, Quaker Oats Co., St. Joseph, Mo., plus officers, directors, and chapter officers.

Nominations

Oscar W. Olsen, F. H. Peavey & Co., Duluth; Percy C. Poulton, N. M. Paterson & Co., Ltd., Fort William; Ed Raether, Brooks Elevator Corp., Minneapolis; Walter Teppen, Occident Terminal Division, Russell-Miller Milling Co., Duluth; Howard Habegger, Old Fort Mills, Inc., Marion, O.; L. W. Hover, Thomson Grain Elevator Co., Louisville, and Bob Lare, Butler-Welsh Grain Co., Nebraska City, Neb.

New Membership

Ward Stanley, Standard Milling Co., Kansas City; Clifford Steiner, Central Soya Co., Decatur, Ind.; George Cole, Port Authority Grain Terminal, Brooklyn; Vincent Blum, Omaha Elevator Co., Council Bluffs; John Irwin, Western Grain Co., Ltd., Fort William; Fred Keeney, Allied Mills, Inc., Portsmouth, Va.; Russell B. Maas, Screw Conveyor Corp., Hammond, Ind., plus chapter and district appointees.

Resolutions

R. B. Pow, Reliance Grain Co., Ltd., Fort William; Claude Darbe, Simonds-Shields-Theis Grain Co., Kansas City; Paul Blackmon, Quaker Oats Co.,

Sherman, Tex.; Arthur Meyer, McCabe Brothers Grain Co., Ltd., Fort William; Wm. H. Gassler, Rosenbaum Brothers, Chicago; R. C. Baake, Pillsbury Mills, Inc., Minneapolis; Herbert Brand, Quaker Oats Co., Cedar Rapids; L. A. Hunt, Jos. Schlitz Brewing Co., Milwaukee, and Clarence Bach, Archer-Daniels-Midland Co., Minneapolis.

Auditing

James Auld, Hales & Hunter Co., Minneapolis; John Goetzinger, Rosenbaum Brothers, Omaha; J. C. Perry, Fort William Elevator Co., Ltd., Fort William; Charles J. Winters, Public Grain Elevator, New Orleans; H. L. Heinrikson, Terminal Grain Corp., Sioux City, and Leonard Danielson, Arcady Farms Milling Co., Chicago.

Name Change

Lewis Inks, Quaker Oats Co., Akron, O.; Harry Hansen, The Glidden Co., Chicago; John Belanger, Manitoba Pool Terminals, Ltd., Port Arthur; Henry Bowman, G. J. Meyer Malt & Grain Co., Buffalo; Edwin Crawford, National Biscuit Co., Carthage, Mo.; E. R. Anderson, Norris Grain Co., Chicago; Robert R. Bredt, Fruen Milling Co., Minneapolis, and Lloyd Forsell, Albert Schwill & Co., Chicago.

180,000 Sq. Feet of Surface
renewed with
GUNITE and SURFACITE!

All the cracks in this fine-looking elevator were repaired by forcing tough-bonding Gunite into them at a high pressure.

Then the whole structure was thoroughly waterproofed with an extra thick coating of Surfacite.

For a better than new job, write

SOGES EXPLOSION HAZARDS COMMITTEE CONCERNED OVER BIG INCREASE IN BLOW-UPS, MAKES WORTHY RECOMMENDATIONS

Your Dust Explosion Hazards Committee resolves that, since the human element is the most predominate single factor in the cause of any fire or explosion, it is the solemn duty of every delegate to take whatever measures that he may deem necessary and vital to place before the personnel under his direction any information that has been discussed at this convention that would minimize the human element factor in explosion hazards and reduce the deplorable losses in the grain handling industry.

Further, it is resolved and recommended that two permanent Explosion

Committees be set up, one in Canada and one in Chicago, to investigate the possibilities of the uses and applications, either before or after an initial explosion, of inert chemical substances for the reduction of the fire and explosion hazards in the grain handling industry on this continent.

And, be it further resolved that the Secretary of the Society of Grain Elevator Superintendents be instructed to provide each member of this Society with a copy of these resolutions, for posting, as a permanent reminder of the constant Explosion Hazards of this industry.

1947 CONVENTION COMMITTEE URGES WIDER PARTICIPATION IN CONVENTION MANAGEMENT, SPECIAL FEATURES FOR NEWCOMERS, AND EMPHASIS ON ROUND TABLE DISCUSSIONS

The Program Committee, recognizing the tremendous strain on our secretary in arranging the numerous details, planning programs, and outlining activities in preparation for our conventions, pay tribute to Dean M. Clark for the noble effort he has contributed to the planning of our convention program.

We also recognize that the work of planning and directing these conventions is literally the work of more than one man, and, to relieve the pressure on our secretary, and consequently to conduct more profitable meetings, we propose the duties be divided, designated, and delegated to the officers, directors, and qualified members of this Society which will enable the appointees to arrange well in advance of the convention dates the features of our programs, the entertainment of members and lady guests, and other incidentals. We recommend that the first vice-president each year should be delegated to serve as director of planning the convention program for the following year.

We offer these several suggestions: (1) Plan for the program directors and key appointees to be in attendance at the convention the evening before the program begins for the purpose of making final arrangements for an organized program. (2) One stretch period each morning and each afternoon session should be helpful in maintaining interest and attention, and in controlling interruptions. (3) Furthermore, we feel that more serious consideration should be given to

the members and lady guests who are attending their first conventions. "Ice-breakers" and plans to aid them in making contacts should be designated duties of the most capable persons.

The location of the following year's convention should be decided each year at our convention, and with that knowledge the first vice-president, with the assistance and advice of our

AMBITIOUS NEW MEMBERSHIP CAMPAIGN LAUNCHED

The Society of Grain Elevator Superintendents has shown a substantial and healthy increase in new members in the past year, and it is the consensus of this committee that a much

very able and willing secretary, will begin the planning of the next convention program and assign delegated responsibilities to his appointees. Some person should be designated to supervise each activity. Supervisors should be in charge of every feature of the program, including meetings, plant tours, social events, and transportation.

We firmly believe that the round table discussions are a very vital part of our programs, and to a great extent herein we have "fumbled the ball." That calls for more definite scheduling of our meetings, fewer talks, with several alternate speakers to serve as "backers-up" in case of need, and a real effort to start and finish each feature on time. Fewer features thoroughly covered by the best available talent should be our aim. Let's try to run our conventions like we run our businesses.

THINKS WELL PLANNED

I should like to express my admiration for the way the SOGES affairs are organized. I have a slight conception of the tremendous amount of thought and work that goes into them, and I can say, without reservation, that the Society is exceedingly fortunate.—Dr. Beverly N. Smallman, Stored Products Investigations, Division of Entomology, Department of Agriculture, Winnipeg.

greater increase can be made for the coming year.

The SOGES Membership Committee recommends that each Chapter be asked to put on a membership drive of their own design that will cover the terminal markets as well as the outlying territory in their district.

There has been no time since the start of this organization that it has been possible to secure so many new members as at the present time. Let us all get busy and make this a "One Thousand Membership Club" for our convention in 1947!

OAT HULL MEDICINE

Potentially greater than penicillin, a new non-poisonous killer of disease germs, made from an extract of oat hulls compounded with various other chemicals, was recently announced. It will kill or prevent the growth of more kinds of dangerous germs, including tuberculosis, tetanus, typhoid, diphtheria, blood poisoning, rheumatic fever, etc., than its widely publicized predecessor.

CONVENTION ATTENTIVE

It was a real pleasure to attend and speak at the SOGES Cedar Rapids convention. As the fellow said when asked how an audience enjoyed his talk: "They were either interested, or very polite." The SOGES members certainly gave fine attention to the talks that Dr. Shands and I made on barley.

I think the appointment of a Barley Committee is a very good idea and we will be glad to give Mr. L. A. Hunt of the Jos. Schlitz Brewing Co. and the members of his committee every possible coöperation.—Dr. John H. Parker, Director, Mid-west Barley Improvement Ass'n, Milwaukee.

ENJOYED ADDRESSING SOGES

It was a real pleasure to appear before the Society of Grain Elevator Superintendents at their Cedar Rapids convention to discuss the kernel characters useful in identifying barley varieties as threshed grain.

I was much impressed by the interest of this group in this subject, which was manifested by their close attention to the talk.—Dr. R. G. Shands, Agronomist, Division of Cereal Crops and Diseases; Bureau of Plant Industry, Soils and Agricultural Engineering; Agricultural Research Administration, USDA, Madison, Wis.

PLEASED WITH MEETING

I am glad what I had to offer at the Superintendents' convention at Cedar Rapids was acceptable. Naturally, it is pleasing to me to find that my thinking on these matters did meet with public acceptance, and I can only hope that it did generate thinking along constructive lines, which is the purpose for which my remarks were designed.

I am looking forward to getting together with this group again at some future time.—Grandon "Duke" Swanson, Assistant Executive Vice President, Grain & Feed Dealers National Ass'n, St. Louis.

SCHLITZ PROVIDES BEER

The Cedar Rapids convention was graciously favored by the Joe. Schlitz Brewing Co. of Milwaukee with the amber fluid that accompanied the annual fish luncheon on Friday noon—which completed the tasty combination to everyone's pleasure and satisfaction.

To get hurt and sit down is to acknowledge defeat; to rise and fight again and profit by experience, is to succeed.

CONVENTION'S THOUGHTS EXPRESSED IN RESOLUTIONS

Pledge G&FDNA Support

Moved by Herbert C. Brand, seconded by Bart Pow—that, as the SOGES, through our membership in the Grain & Feed Dealers National Association, is vitally interested in the efforts of the National Association to stabilize conditions in the processing and marketing of grain, we assure the Executives of the National Association such support as we may be able to afford.

Thanks Everyone for Grand Help

Moved by Bart Pow, seconded by Herb Brand—that we, as a Society, express our thanks to every one who has contributed directly or indirectly to the success of our convention in Cedar Rapids.

Praise Herb Brand

Moved by Bart Pow, seconded by Bill Gassler—that we express to our retiring President, Herb Brand, our Society's deep appreciation and heartfelt thanks for the very efficient manner in which he has cared for our interests during his extended term of office, and we do crave for ourselves the pleasure of association with Mrs. Brand and himself for many years to come.

Hats Off to Quaker and Manager Poe

Moved by Bill Gassler, seconded by R. C. Bakke—that we, the Officers and Members of the SOGES, tender to The Quaker Oats Company and especially to the Manager of the Company,

Mr. Arthur Poe, our deep appreciation of the wonderful contribution made to the success of our Cedar Rapids convention by their kindly considerations

to both the men and women attending our gathering.

Acknowledge Penick & Ford Courtesies

Moved by Herb Brand, seconded by Art Meyer—that we, the Officers and Members of the SOGES, do tender our hearty thanks to the firm of Penick and Ford, Ltd., for their kindly interest in the success of our convention in Cedar Rapids through throwing their plant open for inspection, and providing such a happy luncheon for our Ladies.

Applause for Associates

Moved by Herb Brand, seconded by Every Member—that we, the active members of the SOGES, record our grateful appreciation to our Associate Members for the many evidences of their continued interest in the welfare of our Society, and we express the hope that the cordial relationships which have been established over the years may be ever continued in surroundings of mutual good will and lasting friendship. We thank them for the pleasure they have afforded us through the reception and entertainment so generously provided.

Regret Randolph's Absence

Moved by Art Meyer, seconded by R. C. Bakke—that we, the Officers and Members of the SOGES, express our deep regret at the inability of our friend, Oliver W. Randolph, to be present at our Cedar Rapids convention, and also tender to him our sincere thanks for his generous contribution to our activities. [Your committee respectfully suggests that the prize for left-handed golfers to be played for under Mr. Randolph's stipulations, be carried forward to 1947. There being no room (and besides it rained) on our crowded program for athletic diversion this year, we recommend due time and arrangements be made for the event.]

Swell of Cedar Rapids Firms

Moved by Art Meyer, seconded by Claude Darbe—that we, the Officers and Members of the SOGES, extend our heartiest thanks to the Wilder Grain Company, the J. M. Piper Grain and Milling Company, and the Federal-North Iowa Grain Company, and to the J. C. Kintz Company for their kindnesses in entertaining our Ladies.

A Bow to Grain Trade's Wives

Moved by Clarence Bach, seconded by L. A. Hunt—that a special vote of thanks be extended by the Officers and Members of the SOGES to Mesdames Stephen W. Wilder, Tudor E. Wilder, Leland C. Miller, Ronald Booth, and to Mr. Jack Piper for their many kindnesses to our Ladies at the Cedar Rapids convention.

Appreciation for Ladies' Reception

Moved by Claude Darbe, seconded by Paul Blackmon—that the Officers and Members of the SOGES record our sincere appreciation of the most generous recognition of the Society's annual convention accorded to our Ladies by Mr. and Mrs. B. J. Many of Chicago.

Obliged for Keeping Ladies Busy

Moved by Paul Blackmon, seconded by Herb Brand—that we, the Officers and Members of the SOGES, voice our sincere appreciation to Mr. and Mrs. J. C. Kintz for providing entertainment for our visiting Ladies at their Friday afternoon festivities.

Thanks for Facilities

Moved by Bill Gassler, seconded by Bart Pow—that we, the Officers and Members of the SOGES, express to the Cedar Rapids Country Club our sincere thanks for their kindness in making their clubhouse facilities available for the entertainment of our Ladies.

Bouquets to Kozak and Maas

Moved by L. A. Hunt, seconded by Claude Darbe—that we, the Officers and Members of the SOGES, do most cordially thank Russell Maas and Joe Kozak for making our Ladies most happy by presenting them with corsages on our banquet night. The Mass-Kozak finesse leaves nothing to be desired.

Rock Island Furnished Cards

Moved by Bill Gassler, seconded by Clarence Bach—that the Officers and Members of the SOGES extend their sincere thanks to the Rock Island Lines for their kindly contribution toward the entertainment of our Ladies on the occasion of our Cedar Rapids convention.

Recognize Turning's Help

Moved by Herb Brand, seconded by Art Meyer—that the SOGES recognizes the fine contribution made to the success of our Safety program by Clarence W. Turning, through his untiring effort in the face of discouraging circumstances. As a tangible token of our appreciation we recommend to the Finance Committee that Mr. Turning be granted an honorarium of \$200. We recommend that the Safety Contest be continued, under Oscar Olsen's guidance.

Will Buy Equipment Instead

Moved by Bill Gassler, seconded by Bart Pow—that as a Society we record our appreciation of the faithful service rendered by our hard-working and efficient secretary, Dean Clark, who in face of exacting conditions has made a success of the work of our organization. We recommend to the Finance Committee that an honorarium of \$500 be granted him as a token of our regard for this patient and painstaking work on our behalf.

AUDITING COMMITTEE REALLY WORKED

WE, your Auditing Committee, have carefully audited the Books of the Society for the years of 1944 and 1945, up to and including December 1945, and found the books in order except for 1c, leaving a balance of \$1,515.16.

By a vote of the Committee, we donate the 1c to make the balance show \$1,515.17, as the Treasurer's report shows.

We hope no such errors occur in the future, as we spent from 9:00 a. m. until 2:00 p. m. attempting to find same.

SOGES MEMBERS IMPRESS HIM

I have been very favorably impressed with the marked contrast of interest shown by terminal elevator and processing plant Superintendents. Generally speaking, I have found those Superintendents who were members of the Superintendents' Society were well informed and actively interested in the prevention of dust explosions, whereas those Superintendents who were not members were neither well informed nor actively interested in this vital matter.

Needless to say, I shall endeavor to interest terminal elevator and processing plant Supers in investigating the possibilities of membership in this active association.—Lloyd G. Howe, Engineering Department, North American Companies, Toronto.

POE, NEILSON, AND CHAMPLIN VOTED HONORARY MEMBERS

As has been the annual custom with the Society of Grain Elevator Superintendents, the outstanding grain industry executive of the year is voted a life-time honorary membership in their association.

Not having had a convention for two years, and having overlooked this appointment in 1944, three honorary members were elected at the Cedar Rapids convention.

Frank L. Neilson, Vice President of Cargill, Inc., Minneapolis, and a past president of the Superintendents' Society, who passed away unexpectedly on March 6, 1945, had been previously selected as the outstanding "man of the year" for 1944, had been elected by the SOGES Directors as an honorary member, had been informed of that election, and had acknowledged

the honor before his death. The assembled delegates unanimously approved this action at the Cedar Rapids gathering. His widow was given his merited award.

Victor L. Champlin, General Superintendent, Archer - Daniels - Midland Company, Minneapolis, well known in SOGES ranks, and a contributor of many improvements to expedite the handling of grain and grain products, was given the award for 1945, and the presentation made in Minneapolis following the convention, due to his absence.

Arthur Poe, General Manager of The Quaker Oats Company, Cedar Rapids, gracious host to the SOGES convention, was presented with his token of appreciation at a special session of the convention program.

"I wish you'd quit running Ads in GRAIN."

MILLERS' CHILDREN WIN SCHOLARSHIPS

Scholarships have been awarded to a son and a daughter of Albers Milling Co. employees by the Carnation Co. of Oconomowoc, Wis., parent company. Valued at \$500 each, the annual scholarships, recently established by the firm to honor its late founder and first president, Elbridge A. Stuart, are awarded on a basis of moral character, scholastic ability, and seriousness of purpose.

Miss Shirley Weger, whose father, Wallace Weger, is a field man for Albers in Renton, Wash., and Gordon Hoare, whose father, Stanley Hoare, is superintendent of the Interstate Terminal, Portland, were the lucky recipients for this year. It is planned eventually to award 30 scholarships each year from the \$300,000 trust fund established for this purpose.

THE RECORD

The Supers' Society has held conventions at the following places:

Sept. 1, '30, Sherman Hotel, Chicago.

April 6-8, '31, Sherman Hotel, Chicago.

Oct. 12-14, '31, Rice Hotel, Houston, Tex.

March 28-30, '32, Sherman Hotel, Chicago.

April 3-7, '33, Sherman Hotel, Chicago.

Feb. 10-12, '34, Statler Hotel, Buffalo.

June 8-11, '34, Sherman Hotel, Chicago.

March 30-31, April 1-2, '35, Schroeder Hotel, Milwaukee, and Sherman Hotel, Chicago.

June 12-15, '36, Hotel Duluth, Duluth, and Hotel Nicollet, Minneapolis.

June 14-16, '37, Royal Edward Hotel, Fort William, and Prince Arthur Hotel, Port Arthur.

March 27-30, '38, Hotel Continental, Kansas City, Mo.

April 3-5, '39, Hotel Pfister, Milwaukee.

April 1-3, '40, Royal York Hotel, Toronto.

June 9-11, '41, Hotel Radisson, Minneapolis.

April 9-11, '42, Paxton Hotel, Omaha.

June 18-20, '43, Hotel Duluth, Duluth, and June 21, Fort William-Port Arthur.

June 15-17, '44, Medinah Club, Chicago.

May 23-25, '46, Hotel Roosevelt, Cedar Rapids.

May 15-17, '47, Hotel Continental, Kansas City, Mo.

PRESIDENTS OF THE SOGES

CHRISTOPHER E. WOOD, General Superintendent, Baltimore & Ohio Railroad Elevators, Baltimore, Md., Sept. 1, 1930, until his untimely death on August 13, 1931.

ELMER H. KARP, General Superintendent, Burlington Railroad Elevators, Chicago, to fill President Wood's unexpired term.

ARTHUR C. BENSON, Superintendent, Houston Milling Company, Texas City, Tex., March 30, 1932 to April 7, 1933.

*FRANK L. NEILSON, Vice President, Cargill, Inc., Minneapolis, April 7, 1933 to June 12, 1934.

WILLIAM H. GASSLER, Superintendent, Rosenbaum Brothers, Chicago, June 12, 1934 to April 2, 1935.

OSCAR W. OLSEN, Superintendent, Peavey Duluth Terminal Elevator, Duluth, April 2, 1935 to June 15, 1936.

*HENRY S. COX, Superintendent, Star Grain Division, General Mills, Inc., June 15, 1936 to June 16, 1937.

SIGURD S. ORSTAD, Manager, Federal Grain, Ltd., Fort William, June 16, 1937 to March 30, 1938.

EDWARD J. RAETHER, Superintendent, Brooks Elevator Company, Minneapolis, March 30, 1938 to April 5, 1939.

TED C. MANNING, General Superintendent, Uhlmann Grain Company, Kansas City, Mo., April 5, 1939 to April 3, 1940.

PERCY C. POULTON, N. M. Paterson & Co., Ltd., Ft. William, April 3, 1940 to June 11, 1941.

PAUL H. CHRISTENSEN, Van Dusen-Harrington Co., Minneapolis, June 11, 1941 to April 11, 1942.

GILBERT P. LANE, Arcady Farms Milling Co., Chicago, April 11, 1942 to June 19, 1943.

R. P. POW, Reliance Grain Co., Ltd., Ft. William, June 19, 1943 to June 15, 1944.

HERBERT C. BRAND, Superintendent of Elevators, The Quaker Oats Co., Cedar Rapids, June 15, 1944 to May 23, 1946, and

HAROLD C. WILBER, Elevator Superintendent, A. E. Staley Manufacturing Co., Decatur, Ill., elected May 25, 1946.

*Deceased.

WINS RANDOLPH PRIZE

Mrs. Dewey Hagman of Minneapolis won the door prize donated by Oliver W. Randolph, of O. W. Randolph Co., Toledo.

"I look at it this way:"

"WHILE WE WERE all busy battling down the Axis, war needs naturally had first call on the railroads. Everybody knows how they stood up to their overwhelming job, including carrying the record-breaking crops we raised.

"And now that the war is over and the railroads can get the materials they need for new cars and engines, they are going to be able to give us better service."

★ ★ ★

Railroads are in active partner-

ship with the country's food and fibre producers—connecting its farms with every market throughout the United States.

Railroads are improving their facilities . . . adding new equipment...planning ahead in order to have the *right kind* of cars, in the *right quantity*, at the *right places*, at the *right times*—so that crops can be moved with even greater smoothness and efficiency than the American farmer enjoyed before the war.

DUAL-CLONE EFFICIENCY IS AVAILABLE ONLY IN DAY DUST COLLECTORS

The patented continuous cyclonic air flow in Dual-Clones, with the internal skimmer arrangement in the outlet stack, produces 2-stage separation and eliminates eddy currents and back pressure.

Made in sizes to meet all requirements. Small sizes with single piece cone, larger sizes, illustrated, prefabricated and nested for compact shipment and easy assembling on the job by bolting companion flanges.

OTHER DAY PRODUCTS

include Tanks in bolted construction, Bins, Hoppers, Leg Boots, Heads and Casings, Metal Mill Spouting, Mill Fittings, Bag Cleaners, Exhaust Fans and Special Products. DAY Engineering Service, with its 65 years of experience, assures greater efficiency, safety and profits in DAY-installed equipment. Write us about your plans for the future—no obligation.

...Yes, PR

IT *Stands to Reason!*

For you with big investments in plants and contents, the best weatherproofing is invariably the cheapest—and therefore the most profitable.

Furthermore, you will also agree that weatherproofing grain and grain processing properties early obviously avoids costly disintegration and safeguards against the development of new movement cracks as well.

And wouldn't it appear that a thick, built-up, flexible, "skin-like" product which requires 5½ times as much material for application is the answer to all of these requirements?

Call in **B. J. MANY CO.,**

30 N. LA SALLE STREET

CHIC

PROFESSOR QUIZ:-

Weatherproofing is necessary because water not only damages the grain, but is the sole cause of deteriorative action in any concrete structure.

Question:

Why do you say water is the sole cause of the deteriorative action?

Answer:

Steel corrodes and expands, but water alone causes this corrosion . . . Ice causes serious damage, but it requires water to create ice . . . All other deteriorative action is the direct result of moisture in the concrete.

Question:

Is it difficult to make concrete tanks watertight? If so, why?

Answer:

Yes, it calls for exacting skill because of the many movements caused by the loading of a single bin or the erratic unloading of all tanks, expansion and contraction due to alternate wetting and drying, and many of the other factors with which operators are familiar.

Question:

How can you make a tank weather-tight when you must contend with these continual movements?

Answer:

It is a conceded fact that one must provide a very heavy, flexible film. This must be sufficiently thick so that it will stretch over cracks which are continually opening and closing.

Question:

How can such a sufficiently thick film be obtained?

Answer:

The only way it can be obtained is by building it up. We use four successive layers, each layer being shot on as thick as possible without running. Each thickness is properly "cured" before the succeeding film is applied.

Question:

Will such a thickness of materials remain permanently bonded to the concrete?

Answer:

IN-FIL-TRO-FLEX—our especially compounded product—forms a perfect bond as is evidenced by many installations of over ten years' standing which are just as water-tight now as when completed.

Question:

Then why is there so much groping with the problem of weatherproofing grain tanks?

Answer:

There isn't any problem as far as we're concerned for we've solved it in this way:

We manufacture our own products especially prepared to meet all the above requirements—but we sell no material. Instead, we handle all our work under contract and guarantee for your greatest satisfaction and savings.

Equally important, our engineers and mechanics are all experienced in this very exacting type of work. Why not consult us today?

POORLY FED

Under communism, Russia has specialized in producing food. According to Prof. Ellsworth Huntington of Yale University, however, she hasn't succeeded very well. In production per man on the farm, Russia ranks 19th among 20 countries. Among 32 countries in the world, Russia ranks 30th in her diet standards.

The commendable work of the Society of Grain Elevator Superintendents has merited the avalanche of new members who have joined its ranks, according to President Harold C. Wilber of A. E. Staley Mfg. Co., Decatur, Ill. The association has taken an active lead in working on most of the acute operative problems confronting the industry, has instigated much research looking towards more efficient and less hazardous plant operation, and will continue to devote its efforts to the general betterment of operational routines, he said.

The fact that management itself is taking more of an active interest, as reflected by the number of owners, operators, general managers and divisional heads who have joined this notoriously progressive body, gives us great encouragement, and forecasts an expanding horizon of usefulness, Mr. Wilber added.

Among those affiliating themselves with the SOGES are:

618 James Messersmith, Kansas Flour Mills Co., Kansas City.

619 William J. Scoles, International Milling Co., New Prague, Minn.

620 Kenneth A. Fisher, Minneapolis (Minn.) Milling Co.

621 Henry Bowman, George J. Meyer Malt & Grain Corp., Buffalo.

622 Roy Johnson, Moore-Seaver Grain Co., Kansas City.

623 George Spafford, Wyandotte Elevator, Standard Milling Co., Kansas City.

624 Archie M. McCormack, Archer-Daniels-Midland Co., Chicago.

625 John E. Carlson, Globe Elevators Division, F. H. Peavey & Co., Duluth.

626 John Maki, Globe Elevators Division, F. H. Peavey & Co., Superior.

627 Logan Veatch, Stratton Grain Co., Chicago.

628 Jerome Mellichere, Vitality Mills, Inc., Chicago.

629 Harry E. Erickson, Lauhoff Grain Co., Danville, Ill.

630 Jesse F. Pugh, Quaker Oats Co., St. Joseph, Mo.

631 Nelson Cotton, Jr., Ohio Farmers Grain Corp., Fostoria, O.

632 Stephen A. Molnar, National Milling Division, National Biscuit Co., Toledo, O.

633 Frank M. Darner, W. S. Nott Co., Minneapolis.

634 Ormand E. Freund, Superintendent, Cepro Elevator, Rahr Malt-ling Co., Minneapolis.

635 Charles L. Hoffman, Superintendent, Great Eastern Elevator, Cargill, Inc., Buffalo.

636 Donald Burke, Superintendent, Nebraska Consolidated Mills, Omaha.

637 Roy E. Riggenbach, Kansas Soya Products Inc., Kansas City, Kans.

638 Clarence E. Goetsch, Superintendent, Continental Grain Co., Buffalo.

639 George McKay, Superintendent, United Grain Growers Terminal, Limited, Ft. William.

640 J. Harmon Doughten, Superintendent, Kasco Mills, Inc., Toledo.

641 J. Cameron Perry, Superintendent, Ft. William Elevator Co., Limited, Ft. William.

642 Timothy J. Graham, retired, Minneapolis.

643 George L. Kenney, Superintendent, Tonka Mills Co., Minneapolis.

644 Robert G. Hunt, retired, Tacoma, Wash.

645 Paul Blackman, Superintendent, Quaker Oats Co., Sherman, Tex.

- 678 W. R. McCarthy, Capitol Elevator Co., Duluth.
- 679 Dale W. McMillen, President of Central Soya Co., and of McMillen Feed Mills, Inc., Decatur, Ind.
- 680 E. B. Evans, Manager, Evans Elevator Co., Decatur, Ill.
- 681 Charles H. Huskisson, Elevator Superintendent, Russell-Miller Milling Co., Alton, Ill.
- 682 Jake C. Kintz, J. C. Kintz Co., Cedar Rapids.
- 683 Colin S. Gordon, Vice-President, Quaker Oats Co., Chicago.
- 684 Cecil VanFleet, Superintendent, National Oats Co., Cedar Rapids.
- 685 E. A. Christie, Superintendent, Quaker Oats Co., Cedar Rapids.
- 686 Roy K. Zimmerman, Superintendent, Superior Grain Corp., Buffalo.
- 687 Frank C. Blodgett, Superintendent, Victoria Elevator Co.,avenport.
- 688 Philip Hackney, Elevator Superintendent, Pillsbury Mills, Inc., Wichita.
- 689 Alfred E. Sorenson, Plant Superintendent, Cargill, Inc., Cedar Rapids.
- 690 C. Raymond Pound, Mechanical Engineer, Cargill, Inc., Cedar Rapids.

America finds a new, easy way to save

DURING the war, millions of wage earners set aside billions of dollars for War Bonds through *weekly pay deductions* under the *Payroll Savings Plan*.

Under this plan today, millions con-

tinue to buy U. S. *Savings Bonds* . . . to put away the money for new homes, new cars, new appliances.

Suggestion: Why not save this new, easy way too?

SAVE THE EASY WAY... BUY YOUR BONDS THROUGH PAYROLL SAVINGS

THERE MAY BE SOMETHING IN THIS FOR YOU

The following factors all add up to IMPERIAL BELTING — it will pay you to consider them well:

DUCK

The 37½ oz. tight-woven duck used is 17% heavier and 33⅓% stronger than the 32 oz. duck found in competitive grain belts.

CONSTRUCTION

Two-fold innerlocked stitching eliminates ply separation for all time.

COMPOUND

IMPERIAL BELTS are impregnated with incomparable compounds that expressly adapt each brand to its service. These compounds lubricate, waterproof, strengthen and preserve the belt's fibers and, reducing slippage, tend to deliver more grain per hour.

You can't help but profit from sending for the names of users and service data, dating back to 1910. Send for the list—no obligation.

Deliveries—Pre-War Promptness

IMPERIAL BELTING COMPANY
1750-1800 S. Kilbourn Ave., Chicago 23, Ill.

WHAT'S IN A NAME?

The Bakery & Confectionery Workers International Union of America, AFL., is trying to organize a grain firm's employees in Georgia.

In a northern state the governor recently appointed a fact finding commission to investigate a dispute between employees and some terminal grain elevators and flour mills. The union in question (and which ones aren't), was the Food, Tobacco, Agricultural & Allied Workers, CIO.

What's in a name? Apparently everything.

Mitchell New I.I.M.T. Head

CHARLES J. MITCHELL, Assistant Manager of the Mill Mutuals North West Department, Minneapolis, was elevated to the presidency of the International Institute of Milling Technology at that body's annual convention held at the Hotel Morrison, Chicago, on Tuesday, June 4. Mr. Mitchell succeeds Mr. Frank M. Walter, of the Publicker Commercial Alcohol Company, Philadelphia, who has been at the helm of this research body for the past two years.

Treasurer Russell B. Mass of Screw Conveyor Corporation, Hammond, Indiana was elected first vice president, John L. Neenan of Allis-Chalmers Mfg. Co., Milwaukee, was elected second vice-president, and Mr. E. G. Berry of B. F. Gump Company, Chicago, was named treasurer.

Directors elected include Esli A. Marsh of St. Regis Paper Company, Oswego, N. Y., Grover C. Meyer of Kansas City (Mo.) Power & Light Company, and H. C. Watson of Alexander Bros., Chicago. J. I. Chamberlain, Maple Leaf Milling Company, Ltd., Toronto, is a hold-over director. Dean M. Clark of Chicago was re-elected secretary.

Principal speaker of the evening was Dr. Milton E. Nelson of the Illinois Institute of Technology, Chicago, who has spent a number of years in milling and baking research, both in the United States and Canada.

Vote Library Fund; Offer Help

A LIBRARY fund was voted, to be placed in charge of a Library Committee, and members contributed their personal texts to launch this new undertaking in a commendable and note-worthy manner.

The association went on record as desiring to offer the trade papers serving the industry and their readers such engineering services as conditions permitted.

Mr. John L. Neenan urged all to comply with the Federal Food & Drug Act. "We are doing everything we can to change the design of our milling machinery to aid millers in complying with this law," he said. "Some of us don't like it, but in the long run it will prove best for all concerned."

Argentine Wheat "Tops"

Tom Luby of Cia Molinera Del Peru, Lima, Peru, told of the differences in milling in that country

as compared to milling in the United States. Mr. Luby has four mills under his supervision built by English, Italian and Spanish engineers respectively. They are the regular conventional systems, however.

Wheat comes to Peru from the United States, Canada, and Argentina, and Mr. Luby said: "I never milled any wheat better than that from the Argentine. It takes cleaning and washing, as it contains much foreign material, but it mills beautifully. We have to get 82½% extraction by law, but we are making closer to 84%. We never shut down.

"I feel it would be quite a revelation to the United States mill managers if they could come down and spend a little time in South America, not alone to see how well the mill superintendents are treated, but to learn how the management down there makes an average of 38% on their business operations. Many make from 50% to 80%.

"Due to the weather, we have three hours off for lunch, but South American companies are more than fair in other ways as well. What they offered me and my family was far beyond expectations, and naturally, when one is treated so well, one exerts every effort to aid the business in return.

"The English, Swiss, and the Swedes are all very much on their toes. If they only get a 10c order

from you, they make you feel you have afforded them enough commissions to keep them on top of the heap for life. There are many local representatives throughout the South American countries, and one man may represent a dozen firms and not know a thing about any one company's line.

To Build Open Storage

"I NEVER rains, consequently we are planning on building a lot of open storage. At the present time we have the only concrete storage in the country, and it may also be interesting to know that we use Mack dump trucks to transport wheat from the wharves directly into our warehouses.

"People are very formal in Peru. One always wears a coat, regardless of the temperature. Wintertime is beset by fog, but one can go up 2,500 feet in short order and get badly sunburnt before realizing it. In four hours it is possible to go up 14,000 feet.

"Many parts of Lima are as modern as Chicago, but some sections are 300 years old. The natives do not like to work, and if you pay them more than what they have been accustomed to earning per hour, they will only work until they have accrued the same amount of money as they previously received at the lower wage."

George Cormack, formerly production executive of the General Mills,

is the Standard of the Industry

1. Exclusive Design
2. Shape gives bucket greater capacity
3. Correctly positioned lip
4. Contour permits clean discharge
5. Spacing flexibility
6. Operates efficiently at wide range of belt speeds

Because it is designed scientifically, the "Nu-Hy" Bucket assures operators of the highest possible elevating efficiency. Its high front lip is positioned to pick up grain or granular materials smoothly (no steam-shovel attack) retaining the load all the way up the leg. Premature discharge over head pulleys does not occur because of the high curved sides. Discharge is clean . . . no back-legging. Bolt holes are indented to improve traction and eliminate hinging action over head and boot pulleys. Lock nuts are not needed.

DESIGNED TO DELIVER

Write today for capacity analysis form No. 76. Let our engineers make their recommendations. Results are guaranteed—no obligation is incurred by you.

Minneapolis, and now a rancher on the Montana-Wyoming border, George S. O. Smith, Association of Operative Millers' retiring president, of Valier & Spies Milling Company, St. Louis, and W. E. McCraith, A.O.M.'s secretary of Kansas City, were also guest speakers.

Some heads are like door-knobs—anybody can turn them.

INGENIOUS SHIP LOADING UNIT SAVES THE DAY

[Picture on Front Cover]

By C. G. Miller, Assistant Superintendent

A roaring fire destroyed the ship-loading gallery of Continental Grain Co.'s Sunset Elevator in Galveston. To say that every member of the elevator crew had a "sinking" feeling would be putting it mildly.

There were ship orders on hand. There were ships coming in. And to top it all off, material was, as everyone knows, difficult to obtain.

But the emergency didn't stump Superintendent Clarence E. Hackleman! He got busy right away, and the pic-

ture [on this month's front cover] shows the result.

The ship loading device consists of a screw conveyor, having two sixteen-inch screws, with a load capacity of about nine to ten thousand bushels per hour. Taking other used parts and the new screw, plus some 1800 feet of used belting from different elevators, two ships were promptly loaded when this picture was taken, with others coming up.

Mr. Hackleman is well known in grain circles, and deserves much credit for rising to this emergency. His brain-child is probably the only one of its kind. When located in Omaha with the same company, Mr. Hackleman was an officer of the Superintendents' SOGES Chapter there. From the above it is obvious that he is still contributing "food for thought" in solving problems confronting him.

"What we need is BROAD coverage."

CARLOADINGS OFF 4%

Carloadings of grain and grain products during the current period were off 3.9% under those of last year, and were under the preceding year by 2.2%, and were, for the weeks ending:

	1946	1945	1944
June 8	43,506	53,011	43,895
June 1	39,303	48,513	37,107
May 25	34,905	53,562	41,125
May 18	42,138	53,189	40,600

Cumulative loadings for the first 23 weeks were: 1,029,359 in '46, 1,071,298 in '45, and 1,052,141 in '44.

WHEAT GRIND TUMBLES; 314 MILLS GRIND 94%

During April, 984 flour milling companies operating 1,098 mills (of which some were idle), ground 42,745,000 bu. wheat. This compares with 44,975,000 bu. ground the previous month by 1,093 mills, and 50,627,000 bu. ground by 1,030 the year before.

Of the amount ground in April of this year, 314 mills ground 93.6%, or 40,031,000 bu. According to the Department of Commerce, the 984 companies reporting to it account for 98% of the total U. S. production.

CORN GRIND STEADY

During May, the 11 refiners of corn ground 9,294,034 bu corn for domestic consumption.

HIGH CAPACITY GRAIN CLEANING EQUIPMENT for TERMINAL ELEVATORS!

NEW PRIORITY-RATED
EQUIPMENT AVAILABLE
FOR ESSENTIAL NEEDS

Hart-Carter normally offers a complete line of special, heavy-duty cleaners for terminal elevators. Included are the 2564 Carter Disc-Cylinder Separator, combining discs and cylinders; and the all-cylinder 45 Hart Uni-flow Grain Separator. These machines offer a profitable answer to whatever cleaning, grading, separating or processing jobs you may be called on to handle.

HART-CARTER COMPANY

Minneapolis, Minn.

THE RIGHT TO WORK

Life, liberty and the pursuit of happiness, natural rights and privileges enunciated in the Declaration of Independence and guaranteed by the Constitution, are essentially individual in character, and the individual, under the Constitution, is given complete freedom in working to attain these blessings.

This freedom to work has produced a system under which the individual worker may determine for himself how he will bargain with his employer, and the basis on which he will accept employment.

In recent years the rights of the individual have been seriously impaired. Labor bosses, greedy for power and personal gain, aided by federal bureaucrats, have forced upon employers contracts which have deprived the worker and the employer of their Constitutional right of freedom of contract.

Constitutional equality—equal rights and privileges, and corresponding responsibilities—can only be maintained if the individual remains free to choose his employer and to contract for employment on a basis free from the dominating influence of labor racketeers.

Reaffirming its adherence to the principles of individual freedom, we believe that the closed shop permits labor bosses to put the individual worker under a system of enforced servitude, and we will devote every energy to re-establish and maintain the right of the individual worker to the enjoyment of the blessings guaranteed under the Constitution, and for which the American people have fought.

FASTER LOWER COST BLEACHING

Install an

ANSUL SO₂ GRAIN BLEACHING SYSTEM

No Drying...No Rehandling Necessary

Replace costly, cumbersome, inefficient Sulfur Burner equipment with a modern ANSUL (Patented) SO₂ Grain Bleaching System. Easy and economical to install and operate, the ANSUL System mixes pure, liquid sulfur-dioxide with water mist to form a constant sulfurous acid concentration that completely coats each kernel for perfect uniformity of bleaching.

Always ready for instant operation, the ANSUL process assures rigid control of bleaching and economically enhances the appearance value of off color grain. The entire system may be turned on or off with the twist of a valve handle. Grain can be bleached as needed. No obnoxious fumes, no heating, cooling, drying nor rehandling, no fire hazard. Stops grain fermentation immediately.

Write for detailed information on the ANSUL Patented Grain Bleaching Process. Our technicians will show you how easily it may be installed in your elevator. Enjoy the benefits of faster, more efficient grain bleaching.

PLAN CRUSADE TO ST. JOE

The Kansas City SOGES Chapter is going to arrange a trip up to St. Joseph early in November, and it is our intention of interesting the Supers there, at Leavenworth, Atchison, and other nearby points in meeting with us.—Harley J. Hixson, Continental Grai Co., Kansas City.

NEED MORE LIKE HIM

I received my new membership card in the SOGES and want to sincerely thank you for your interest in my behalf. I should have made application long ago, for I know the good work this association is doing, but just neglected doing so.—F. E. Blodgett, Victoria Elevator Co., Davenport, Iowa.

KEN MILLER DIED

I regret to advise that Ken S. Miller, Superintendent of the Canadian Pacific Elevator here, passed away during October of 1945. It is possible that news of Mr. Miller's passing has failed to reach you.

I have succeeded Mr. Miller as Superintendent.—F. J. Emery, West Saint John, N. B.

THE FACT STILL REMAINS
that

SUPERIOR ELEVATOR CUPS
are

MADE STRONGER
will

LAST LONGER
have

GREATER CAPACITY
and will operate more efficiently
at less cost than other elevator
cups.

R. D. HARFST TO SEEDBURO

In line with its program of post-war expansion, the Seedburo Equipment Co. announces the addition of R. D. Harfst to its staff. He will assist in the further improvement of customer service through market research and new product development, and assist General Manager P. W. Burrows in administrative matters.

Mr. Harfst comes to Seedburo directly from military service in which he served as a contract termination officer with the Chicago Ordnance District, embracing the mid-west area from Illinois to the Dakotas.

Before the war his work on the commercial loan staff of The Detroit Bank of Detroit, involved the analysis and evaluation of sales and production policies and the related financial problems of borrowing customers throughout the state.

Graduated from Wesleyan University in Connecticut, Mr. Harfst later specialized in marketing and sales management at the Harvard Business School.

FAULRING LEAVES A-D-M

Milton H. Faulring, formerly associated with Archer-Daniels-Midland Co. in Chicago and Toledo, and more recently located in one of the firm's Texas plants, has resigned. He will take an extended rest before announcing his future plans. Mr. Faulring was president of the Toledo Board of Trade while active in that market, and appeared on several SOGES programs when in Chicago.

Flattery is soft soap and soft soap is 90% lye.

SCHENK'S SON CALLS

Joe Schenk, tall, slender son of the late Gilbert Schenk, founder of The Weevil-Cide Company, Kansas City fumigant manufacturer, has been calling on the trade in company with well-known Frank Blodgett. It doesn't take a second look to see whose son Joe is, according to those with whom he has visited.

COULDN'T MAKE IT

Had to give up any plans for coming to Chicago for the SOGES Chapter trip through the State Line Generating Plant as we had just started malting again after a shut down for repairs, so I couldn't get away. Worked next to that plant, the world's largest, for 10 years and didn't get a chance to go through it, and now, with such an opportunity, I'm disappointed that I had to pass it up.

From all indications, Lloyd Forsell of Albert Schwill & Co. has made a fine president of the Chicago SOGES Chapter, and I am glad of it. I am always interested in your programs and will attend any chance I get.—Ed. Josephson, Schreier Malting Co., Sheboygan, Wis.

PETERSON TO "HOME"

Ernest G. R. Peterson, one of the Founders of the Society of Grain Elevator Superintendents prior to his retirement in 1937, has sold his home and entered St. Paul's House at 3831 N. Mozart Street, Chicago.

An active attendant at SOGES meetings for the eight years prior to his retirement, Mr. Peterson was Elevator Superintendent for the B. A. Eckhart Milling Co., Chicago. He was always proud of holding Membership No. 9. Arthritis and neuritis caused him to become inactive before his years would have suggested his slowing down.

Weevil-Cide SPLITTERS

100-PROOF

"My love for you can't be denied, darling."

She: "I'll say it can't! I've got it in writing!"

* * *

A SEVENTH SENSE

In the last minute rush to get the paper on the press, the makeup man got mixed up and put the birth notices under the head: "What the Women Are Doing."

* * *

WHY?

The dean of women at a large college was criticizing the moral laxity of the students at an assembly. As she closed her speech she announced with severity, "The President and I have decided to stop petting on the campus!"

* * *

GOODNESS, NO!

Romantic Niagara Falls has long been the mecca of newlyweds. Now comes that upstart of an artificial waterfall, Grand Coulee Dam, with plans to install elaborate accommodations to attract tourists. Will that huge pile of concrete and steel make a bride sigh?

The thrill of old Niagara won't be there—not by a dam site.

* * *

SLIGHT MISUNDERSTANDING

Interested old lady questioning a model: "Do you mean that you pose for a man with no clothes on?"

"Heavens, no. He wears pants and everything."

Mike: "Tis a fine child you have there. A magnificent head and noble features. Say Pat, could you be lending me a couple of dollars?"

Pat: "I could not. 'Tis my wife's child by her first husband."

* * *

IT'S AN IDEA ANYHOW

A young woman asked for a pound of floor wax.

New Clerk: "I'm sorry, miss, but all we have is sealing wax."

Young Woman (snappily): "Don't be funny; who'd want to wax the ceiling?"

* * *

OFF KEY

In a country church there was a quarrel over a new organ. Somebody asked an elderly man of strong convictions how he felt about the issue.

"I have not yet made up my mind," said the deacon. "But when I do, I shall be very bitter!"

* * *

GRAMMAR

Another one from the army papers is about the visitor who asked the small boy, "Are your mother and father at home?"

"They was in," said the boy, "but they have went out?"

"Was in! Have went out! Where's your grammar, boy?"

"She's out in the kitchen, cooking dinner."

NONE TOO SOON

Little Jimmy said to his mother, "I'd like a sister like other boys have."

"Why don't you pray for one?" she said.

He did, but after some time, seeing no visible results, he announced, "Mom, I'm not going to pray any more."

His mother urged him not to give up, but to no avail. Several months later the mother was blessed with triplets—three little girls. In due time Jimmy was taken to see the new additions to the family.

After a long look he turned to his mother and said, "Gee, Mom, it's a good thing I stopped praying when I did."

A visitor at an insane asylum was watching one of the inmates pushing a wheelbarrow upside down.

"That's not the way to push that thing," the visitor exclaimed. "You've got it all wrong."

"No, I don't think so," said the inmate. "I used to push it the other way, and they put bricks in it."

* * *

ABOUT TIME

If you dislike these jokes, their dryness makes you moan,
Just send in, occasionally, some good ones of your own.
